

Here are the four company I am interested in and their tech stack:

1)Facebook,

Facebook uses React, GraphQL, Cassandra, Flux, Framer, Jenkins and many more.

2)Amazon,

Amazon uses React, Redux, Redux-saga, java, mySql, Amazon s3, Amazon dynamoDB and many others for its ecommerce site. Besides React, I believe Amazon uses angular in its company as well.

3)Google,

Google uses Python, Java, AngularJS, Golang,C++,Dart,Guava, Material Design, Preact, TensorFlow, Kubernetes and many more.

4) Netflix, Netflix uses Python, Node, Flask, React, mySQL, java, postgresSQL, cassandra, amazon dynamoDB, Amazon EC2, Amazon s3 and many more.
